SUMMARY AND KEY ACCOMPLISHMENTS

My fields of expertise are: Java, Javascript, Android, Html, Asp and C++. I'm also a big fan of microservices, TDD, REST and Clean Coding. I worked at Accenture Technology Solutions as an Analyst Developer for four years. Since September 2012 I have been working in London and improved my knowledge of microservices, TDD, REST and Clean Coding practice working with 2 java champions. Working with them I have also had the opportunity to work on a few projects with java microservices architecture and javascript object oriented. In my previous work experience I was employed by ITHR and Workshare and today I work for Alfresco in London as a Tech Lead / Full Stack Developer. Developing is not just a job for me, I spend my spare time learning new codes every day and taking part in conferences. At the moment my efforts are focused on Android, Java and javascript oo.

EDUCATION AND TRAINING

September 2002 to March 2007

Bachelor's degree: Computer Science and Engineering.

University : University of Naples Federico II , Italy.

Grade : 88/110
